

## PHOSPHORUS SOLUBILIZING BACTERIA – REVIEW ARTICLE

### BAKTERIE SOLUBILIZUJĄCE FOSFOR – PRZEGLĄD

Structure and Environment No. 3/2018, vol. 10, p. 278

DOI: 10.30540/sae-2018-027

#### Abstract

This article reviews the Phosphorus Solubilizing Bacteria, discusses the types of organic acids produced by them, as well as the impact on economy with non-renewable sources, such as phosphate rocks. In addition, the phosphorus solubilization mechanism is discussed.

#### Streszczenie

W niniejszym artykule dokonano przeglądu bakterii solubilizujących fosfor, omówiono rodzaje produkowanych przez nie kwasów organicznych, a także ich wpływ na gospodarkę źródłem nieodnawialnym, jakim są złoża fosforytowe. Ponadto skomentowano mechanizm solubilizacji fosforu.
